App Usage Start Date
2/1/2021

App Usage End Date
3/24/2022

Monthly Active Users is calculated using a *distinct* count of users that interacted with the app at any point during the 30-day period.

Daily Active Users is calculated using a *distinct* count of users that interacted with the app at any point during the previous day.

This data comes directly from the API logs, and is aggregated on a daily basis.

Building Name
All

No. of Residents is calculated using a *distinct* count of users that lived in a unit with an active routine running at any point during the previous 30-day period.

No. of Units is calculated using a *distinct* count of units with an active routine running at any point during the previous 30-day period.

This data comes from the Routine & Unit-Routine tables, aggregated on a daily basis by filtering on Routines that are currently "Active" (active = 'True').

IOTAS Residents & Units with Active Routines

IOTAS Residents & Units with Active Routines by Property (last 30 days)

Count & Percentage of Defective Thermostats (by Device)

Percentage Defective for each Physical Device Name. Color shows details about Physical Device Name. The marks are labeled by Percentage Defective and Count of Defective Thermostats. The data is filtered on Building Name, Status and Hub Status. The Building Name filter keeps 182 of 182 members. The Status filter keeps IN_PROGRESS, LIVE and NOT_STARTED. The Hub Status filter keeps Null and Online. The view is filtered on Physical Device Name, which keeps 8 of 8 members.

Count & Percentage of Defective Thermostats (by Building)

Percentage Defective for each Building Name. The marks are labeled by Percentage Defective and Count of Defective Thermostats. The data is filtered on Status, Physical Device Name and Hub Status. The Status filter keeps IN_PROGRESS, LIVE and NOT_STARTED. The Physical Device Name filter keeps 8 of 8 members. The Hub Status filter keeps Null and Online. The view is filtered on Building Name and Percentage Defective. The Building Name filter keeps 182 of 182 members. The Percentage Defective filter ranges from 10% to 100%.

**** (Record Count for Dates Where the Event Order is equal to 1)**

Alexa & Google Voice

Monthly & Daily Active Users (Residents)

The trends of sum of Monthly Active Users, sum of Daily Active Users, sum of Monthly Active Users and sum of Daily Active Users for Date (Resident App Dau Mau Prod) Day. For pane Sum of Daily Active Users: Color shows details about Iotasclient. For pane Sum of Monthly Active Users: Color shows details about Iotasclient. For pane Sum of Daily Active Users (2): Color shows details about Iotasclientplatform. The data is filtered on Building Name and App Usage Date Filter. The Building Name filter keeps 183 of 183 members. The App Usage Date Filter filter keeps True. The view is filtered on Iotasclient, which keeps Alexa, Alexa/Google and GoogleHome.

BuildingLink Resident App

Monthly & Daily Active Users (Residents)

The trends of sum of Monthly Active Users and sum of Daily Active Users for Date (Resident App Dau Mau Prod) Day. Color shows details about lotasclientplatform. The data is filtered on Building Name, lotasclient and App Usage Date Filter. The Building Name filter keeps 183 of 183 members. The lotasclient filter keeps mobileSdk-BuildingLink. The App Usage Date Filter filter keeps True.

IOTAS Resident App

Monthly & Daily Active Users (Residents)

The trends of sum of Monthly Active Users and sum of Daily Active Users for Date (Resident App Dau Mau Prod) Day. Color shows details about lotasclientplatform. The data is filtered on Building Name, lotasclient and App Usage Date Filter. The Building Name filter keeps 183 of 183 members. The lotasclient filter keeps mobileSdk-lotasResident. The App Usage Date Filter filter keeps True. The view is filtered on lotasclientplatform, which keeps Android, Lambda and iOS.

Westbank Resident App

Monthly & Daily Active Users (Residents)

The trends of sum of Monthly Active Users and sum of Daily Active Users for Date (Resident App Dau Mau Prod) Day. Color shows details about lotasclientplatform. The data is filtered on Building Name, lotasclient and App Usage Date Filter. The Building Name filter keeps 183 of 183 members. The lotasclient filter keeps mobileSdk-WestbankResident. The App Usage Date Filter filter keeps True. The view is filtered on lotasclientplatform, which keeps Android, Lambda and iOS.

Cox Resident App

Monthly & Daily Active Users (Residents)

The trends of sum of Monthly Active Users and sum of Daily Active Users for Date (Resident App Dau Mau Prod) Day. Color shows details about lotasclientplatform. The data is filtered on Building Name, lotasclient and App Usage Date Filter. The Building Name filter keeps 183 of 183 members. The lotasclient filter keeps mobileSdk-CoxResident. The App Usage Date Filter filter keeps True.

IOTAS Residents & Units with Active Routines

The trends of Distinct Users with Active Routines and Distinct Unit Count for Active Routine Capture Date Day. Color shows details about Distinct Users with Active Routines and Distinct Unit Count. The data is filtered on Building Name, which keeps 183 of 183 members.

IOTAS Residents & Units with Active Routines by Property (last 30 days)

Distinct Users with Active Routines and Distinct Unit Count for each Building Name (Resident App Dau Mau Prod). Color shows details about Distinct Users with Active Routines and Distinct Unit Count. The data is filtered on Building Name and Building Name (Units Residents Active Routines). The Building Name filter keeps 183 of 183 members. The Building Name (Units Residents Active Routines) filter keeps no members. The view is filtered on Distinct Unit Count and Building Name (Resident App Dau Mau Prod). The Distinct Unit Count filter includes values greater than or equal to 1. The Building Name (Resident App Dau Mau Prod) filter excludes Null.
